

WHITEPAPER

# ET COIN WEB3

The Mining Project

OCTOBER 2022

# THE PROJECT

ET COIN WEB3 is an audited and verified Web 3.0 mining project on the Binance Smart Chain (BSC). It also includes a social ecosystem with NFTs 3D, Play-to-Earn games, rewards for token holders, Swap & Staking options and a free mobile app for Android and iOS.

ET COIN WEB3 will also be the community token of one of the 80's greatest movie characters.

This coin is going to be its best tribute:  
in 2022 our best space friend officially turns 40 years old!

# MINING ET COIN FOR PROFIT

**To mine ET Coin profitably,  
you will need:**

- A Windows/Linux/Mac OS computer
- One or more ASIC miners for Script-based cryptocurrencies (non-exclusive)
- Power supplies for your ASIC miners
- An account with a mining pool
- Access to relatively cheap electricity
- An ET Coin wallet where the mining pool will send your mining rewards

# ASIC Miners

ASICs are devices optimized to perform one specific task; in the case of Script ASIC miners, this task consists in calculating as many hashes as possible over a short period of time. This allows miners to have more chances of finding the proper hash for a block they have prepared.

ASIC miners, in comparison to GPUs, are louder and usually generate more heat. This means that ASICs need to be housed in a dedicated room, such as a garage or a basement, or in a purpose-built shed. It is recommended that the location where ASIC miners and the computer used to control them are housed has proper ventilation and can be cooled down easily.

If you do not have mining equipment, you will directly receive rewards tokens daily from our exclusive ET mining rig.

# **NFT EXPO PLANET & MARKETPLACE**

**NFT Expo Planet is the first commercial digital gallery in the world with a fully immersive 3D interface and a marketplace for physical goods.**

**This exclusive space gallery on the ET COIN WEB3 ecosystem seeks to open the doors for NFT 3D art creators to share their projects in our metaverse.**

**Holders will have access to games and activities for prizes in cryptocurrencies.**

**Community is the most important thing here: every 15 days 2 community member NFT collections will be chosen and given a chance to exhibit and sell their pieces at the NFT Expo Planet.**

**The commissions of these sales will be distributed equally among the main holders.**

# ***PLAY-TO-EARN GAMING***

**We believe in a robust and inclusive world economy, where all participants have the possibility of access without distinction of race, gender, nationality or socioeconomic level.**

**Our games on the ET COIN WEB3 platform will be accessible for an amount of our cryptocurrency equivalent to 3.33 BUSD, a sum that will allow entry of all participants without economic exclusion as seen on other platforms.**

**Players earn ET COIN tokens during gameplay and can trade them for other currencies on ET Swap.**

**In addition, there will be a rewarding scholarship program with a minimum investment. It is a game developed under Play-to-Earn principles.**

# STAKING & REWARDS

Staking is a way to reward our community members for having a long-term mindset and protecting their cryptoassets from speculation. By staking your tokens, you will be able to earn ET COIN rewards when you lock them through our interface.

Going forward, staking ET COIN will give you a vote and say in the use of the Community Treasury, soon to hit \$1 million in value.

The interests will be paid in ET COIN and the initial APY (Annual Percentage Yield) will be around 22%, rate that will make the investment very attractive for future users. Compound interest will be considered automatically so the user will generate better returns by saving time between transactions. We will also put into play incentive programs for stakeholders to add value to ET COIN WEB3.

In the further future, our community may update our staking system with more interesting annual percentage yields to give better rewards to those who have added measurable value to our ecosystem. There is still much research and experimentation to be done on this aspect of governance.

Finally, stakeholders who are not players or are not interested in participating in governance could delegate their voting rights to other parties.

# ET SWAP

The swap option will allow users to exchange assets while maintaining full ownership of their cryptos.

ET COIN WEB3 will integrate fifteen (15) digital assets as trading pairs of the top fifty (50) with the largest market capitalisation.

We will continually add new cryptocurrencies according to the demand of our community.

We aspire to a streamlined experience that eliminates fragmentation. An increasing number of large companies now accept digital assets as a payment method, which means that cryptocurrencies are entering further on our daily lives. In order to achieve mass adoption, new users have to use platforms that offer full transparency when it comes to trading fees. ET COIN will offer extremely competitive rates as we are unanimously convinced that community adoption is what will take the project forward.

Considering that, we will offer a fixed exchange fee which means the user would know how many tokens will be received up front, in exchange for a slightly higher transaction fee. Alternatively, the user will be able to cut costs by using a floating rate and exchanging their digital assets at the current market price.

This intuitive service will be available through our website and will offer an easy and safe way to exchange cryptocurrencies.

# TOKEN DISTRIBUTION

## 50% PUBLIC SALE

Public sale token on the launchpad PancakeSwap.

## 25% FAIR LUNCH

**PinkSale**

Private Sale on PinkSale Finance.

## 20% BURN SOON

A large portion of the overall token supply will be burned to increase the overall ETCWEB3 scarcity.

## 3% MARKETING

It will be used for several marketing strategies like like Business to Business (B2B), Call To Action (CTA), Close Range Marketing (CRM) and advertising campaigns.

## 2% TEAM

Team tokens for operating expenses will only account for 2% of the total ETCWEB3 supply.
